

Complexity: A Guided Tour

by Melanie Mitchell

Oxford University Press, 2009

Table of Contents

Acknowledgments

Preface

Part I: Background and History

Chapter 1: What is Complexity?

Chapter 2: Dynamics, Chaos, and Prediction

Chapter 3: Information

Chapter 4: Computation

Chapter 5: Evolution

Chapter 6: Genetics, Simplified

Chapter 7: Defining and Measuring Complexity

Part II: Life and Evolution in Computers

Chapter 8: Self-Reproducing Programs

Chapter 9: Genetic Algorithms

Part III: Computation Writ Large

Chapter 10: Cellular Automata, Life, and the Universe

Chapter 11: Computing with Particles

Chapter 12: Information Processing in Living Systems

Chapter 13: How to Make Analogies (If You Are A Computer)

Chapter 14: Prospects of Computer Modeling

Part IV: Network Thinking

Chapter 15: The Science of Networks

Chapter 16: Applying Network Science to Real-World Networks

Chapter 17: The Mystery of Scaling

Chapter 18: Evolution, Complexified

Part V: Conclusion

Chapter 19: The Past and Future of the Sciences of Complexity

Notes

Index
